SUBJECT : Murphy Commission

STAT 1. Here is the formal start of the Murphy Commission's studies. I am giving personal attention to the matter and, as you know, [redacted] is assigned as the liaison officer. She has been instructed to work through you and the other addressees and to keep me informed of progress.

2. She has pulled together a notebook containing some basic data on the Murphy Commission and its charter, and it would probably be useful for anyone who may be briefing Commission staff members to have a look at it. Additional guidance can be provided as we go along if any should be needed. We would also appreciate it if a memorandum for the record could be submitted by participants in briefings of the Commission staff so that we will have a central record of what has been done and said.

3. I appreciate your cooperation and hope that this program can be completed without too much disruption of your schedule.
